Case No: 4:21-cv-06893

PATENT CASE

COMPLAINT

Plaintiff Social Positioning Input Systems, LLC (“Plaintiff” or “SPIS”) files this Complaint against LogiNext Solutions, Inc. (“Defendant” or “LogiNext”) for infringement of United States Patent No. 9,261,365 (hereinafter “the ‘365 Patent”).

PARTIES AND JURISDICTION

1. This is an action for patent infringement under Title 35 of the United States Code. Plaintiff is seeking injunctive relief as well as damages.

2. Jurisdiction is proper in this Court pursuant to 28 U.S.C. §§ 1331 (Federal Question) and 1338(a) (Patents) because this is a civil action for patent infringement arising under the United States patent statutes.

3. Plaintiff is a Texas limited liability company with an address of 1 East Broward Boulevard, Suite 700, Ft. Lauderdale, FL 33301.

1 4. On information and belief, Defendant is a Delaware corporation with its
2 principal office located at 5002 Spring Crest Terrace, Fremont, CA 94536. On
3 information and belief, Defendant may be served through its agent, Vcorp Services,
4 LLC, 1013 Centre Road Suite 403-B, Wilmington, DE 19805.

5 5. On information and belief, this Court has personal jurisdiction over
6 Defendant because Defendant has committed, and continues to commit, acts of
7 infringement in this District, has conducted business in this District, and/or has
8 engaged in continuous and systematic activities in this District.

9 6. On information and belief, Defendant's instrumentalities that are alleged
10 herein to infringe were and continue to be used, imported, offered for sale, and/or sold
11 in this District.

12 **VENUE**

13 7. On information and belief, venue is proper in this District under 28
14 U.S.C. § 1400(b) because Defendant is deemed to reside in this District.
15 Alternatively, acts of infringement are occurring in this District and Defendant has a
16 regular and established place of business in this District.

17 **COUNT I**

18 **(INFRINGEMENT OF UNITED STATES PATENT NO. 9,261,365)**

19 8. Plaintiff incorporates paragraphs 1 through 7 herein by reference.

20 9. This cause of action arises under the patent laws of the United States
21 and, in particular, under 35 U.S.C. §§ 271, *et seq.*

22 10. Plaintiff is the owner by assignment of the '365 Patent with sole rights
23 to enforce the '365 Patent and sue infringers.

24 11. A copy of the '365 Patent, titled "Device, System and Method for
25 Remotely Entering, Storing and Sharing Addresses for a Positional Information
26 Device," is attached hereto as Exhibit A.

27 12. The '365 Patent is valid, enforceable, and was duly issued in full
28 compliance with Title 35 of the United States Code.

13. Upon information and belief, Defendant has infringed and continues to infringe one or more claims, including at least Claim 1, of the ‘365 Patent by making, using (at least by having its employees, or someone under Defendant's control, test the accused Product), importing, selling, and/or offering for sale associated hardware and software for asset locating services (e.g., LogiNext Fieldforce asset tracking platform, and any associated hardware, apps, or other software) (“Product”) covered by at least Claim 1 of the ‘365 Patent. Defendant has infringed and continues to infringe the ‘365 patent either directly or through acts of contributory infringement or inducement in violation of 35 U.S.C. § 271.

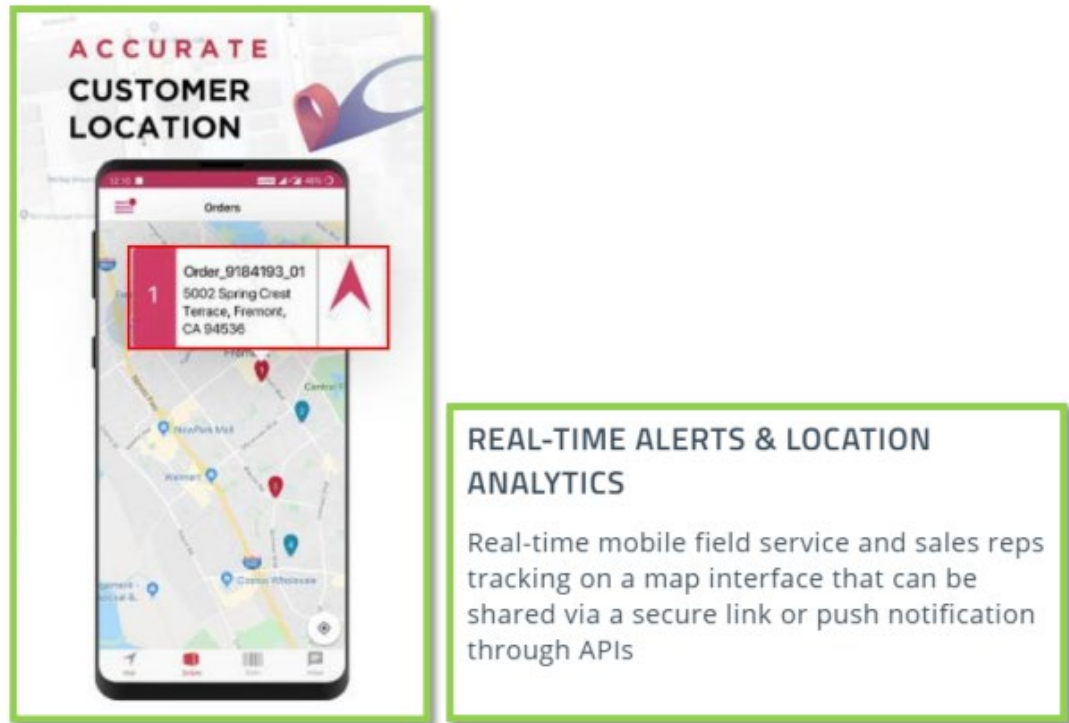

14. The Product provides an asset tracking system for real-time GPS tracking of assets. A user can receive location information on a positional information device (e.g., mobile device or computer). Certain aspects of this element are illustrated in the screenshot(s) below and/or in those provided in connection with other allegations herein.

LogiNext FieldForce is the mobile application used by on-field agents to help them follow an optimized beat plan for their daily tasks. The application directs the field workforce through an optimized route which, in turn, helps them reach meetings and task locations on time. The application also helps them capture the exact service time spent at the location and the client's feedback. Since the application is directly paired with the cloud, real-time tracking of all these parameters can be observed and managed by the supervisor back at the hub, center, or headquarters.

Source: https://play.google.com/store/apps/details?id=com.loginext.fieldforce&hl=en_IN&gl=US

LogiNext FieldForce helps improve overall field workforce efficiency using route optimization and real-time tracking to better the beat planning and its on-ground execution. LogiNext's comprehensive analytics reports cover every detail about each task assigned to each field agent. All this information is showcased in an easy to understand visual format for the supervisor.

15. The Product software sends a request from a first (requesting) positional information device (e.g., mobile device or desktop with software installed) to a server. The request is for the real-time location (e.g., stored address) of an asset, and includes a first identifier of the requesting positional information device (e.g., user ID and password for the Product software used in the particular enterprise). The request is sent to the Product server for transmitting the asset location. The server receives the at least one address from a second (sending) positional information device at the asset (e.g., employee mobile phone). Certain aspects of this element are illustrated in the screenshot(s) below and/or in those provided in connection with other allegations herein.

16. The at least one address is received from the server at the requesting positional information device. For example the Product's server transmits the position of an asset (at least one address) to the requesting positional information device. Certain aspects of this element are illustrated in the screenshot(s) below and/or in those provided in connection with other allegations herein.

LogiNext FieldForce helps improve overall field workforce efficiency using route optimization and real-time tracking to better the beat planning and its on-ground execution. LogiNext's comprehensive analytics reports cover every detail about each task assigned to each field agent. All this information is showcased in an easy to understand visual format for the supervisor.

17. A second identifier for the second (sending) positional information

1 device is determined based on the first identifier and the server retrieves the at least
 2 one address stored in the at least one sending positional information device. The
 3 Product application installed on the requesting positional information device requests
 4 (from the server) the asset's GPS location (i.e., at least one stored address stored). As
 5 shown above, before activating the tracker (i.e., the sending positional information
 6 device), a unique tracking device's ID number or credentials (i.e., second identifier)
 7 needs to be added to the user's account identified by the user login ID and password
 8 (i.e., the first identifier). Hence, the tracker device's ID number or asset credentials
 9 (i.e., second identifier) is mapped to the user's login ID (i.e., the first identifier) for
 10 tracking the real-time location (i.e., at least one stored address stored) of the asset.
 11 Certain aspects of this element are illustrated in the screenshot(s) below and/or in
 12 those provided in connection with other allegations herein.

13 LogiNext FieldForce is the mobile application used by on-field agents to help them follow an
 14 optimized beat plan for their daily tasks. The application directs the field workforce through an
 15 optimized route which, in turn, helps them reach meetings and task locations on time. The application
 16 also helps them capture the exact service time spent at the location and the client's feedback. Since
 17 the application is directly paired with the cloud, real-time tracking of all these parameters can be
 18 observed and managed by the supervisor back at the hub, center, or headquarters.

18. Defendant's actions complained of herein will continue unless Defendant is enjoined by this court.

19. Defendant's actions complained of herein are causing irreparable harm and monetary damage to Plaintiff and will continue to do so unless and until Defendant is enjoined and restrained by this Court.

20. Plaintiff is in compliance with 35 U.S.C. § 287.

DEMAND FOR JURY TRIAL

21. Under Rule 38 of the Federal Rules of Civil Procedure, Plaintiff requests a trial by jury of any issues so triable by right.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff asks the Court to:

(a) Enter judgment for Plaintiff on this Complaint on all causes of action asserted herein;

(b) Enter an Order enjoining Defendant, its agents, officers, servants, employees, attorneys, and all persons in active concert or participation with Defendant who receive notice of the order from further infringement of United States Patent No. 9,261,365 (or, in the alternative, awarding Plaintiff a running royalty from the time of judgment going forward);

(c) Award Plaintiff damages resulting from Defendant's infringement in accordance with 35 U.S.C. § 284;

(d) Award Plaintiff pre-judgment and post-judgment interest and costs; and

(e) Award Plaintiff such further relief to which the Court finds Plaintiff entitled under law or equity.

Dated: September 5, 2021

Respectfully submitted,

/s/ Stephen M. Lobbin
